

COMMUNICATION WITH SUPPLIERS AND SUBCONTRACTORS

KRYPTON CHEMICAL SL has homologation protocols for both suppliers and subcontractors so that initially each of them must be homologated in order to work together with the company.

This initial step must follow the indications established for the approval of the supplier and corroborate that the supplier knows and accepts the quality policy of KRYPTON CHEMICAL SL. Otherwise you will not be eligible to be a supplier to the company.

At the same time and on an annual basis, in the event that due to quality defects, incidents or other reasons detected by the company, KRYPTON CHEMICAL SL may notify the supplier of the withdrawal of the system, the UNSUITABLE to be a supplier of the company.
